

WHAT'S IN YOUR BOX?

Tech Expert® Premium ETBs are 100% NEW, Never Remanufactured

As an expert Electronic Throttle Body manufacturer, we maintain complete quality control throughout the entire manufacturing process. We assemble and calibrate the components and validate output voltages to ensure they match OE for fit, form and function. Tech Expert® by NAPA® Echlin® ETBs are application-specific and precision engineered for the units they are replacing.

**What's inside the Tech Expert® box...
improved gear trains, extensive testing
and over 100 years of experience.
What's in your box?**

ETBs have high OE failure rates, and most are caused by a failure in the gear train. NAPA® Echlin® engineers review OE weak points and update the geometry and materials (when necessary) for a longer-lasting ETB.

**GASKETS
INCLUDED**

Gaskets included for a complete repair, where required

100%
NEW, CALIBRATED
AND TESTED

100% NEW, never remanufactured and 100% calibrated & tested

200+
SKUs

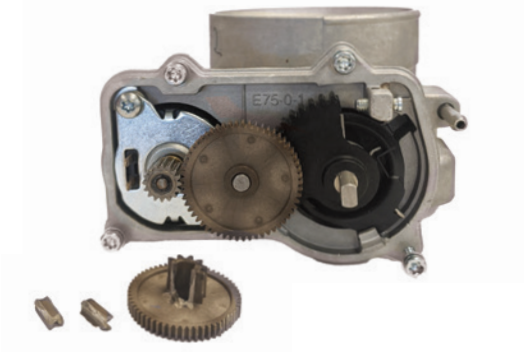

Tech Expert® is proud to offer a line of ETBs that includes 200+ SKUs covering 190M+ VIO

Our ETBs are the result of superior design, and the testing proves it.

Tech Expert® Electronic Throttle Bodies' superior quality stands up to the most severe underhood conditions and strenuous demands of today's engines – the competition did not.

COMPETITION

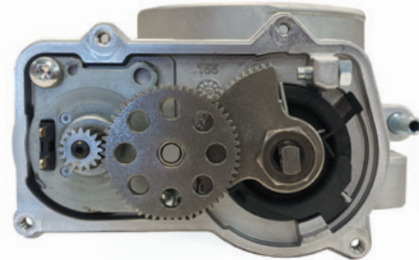

FAILED

- After only 10 days of testing, the competitor ETB failed with a cracked compound gear
- Inherent design flaws rendered the competitor unit unusable

TECH EXPERT® ETB103

PASSED

Source: SMP Testing Lab, 2020

- Even after 45 days of endurance testing, our ETB was intact and fully operational
- Tech Expert® by NAPA® Echlin® delivers a premium-quality ETB that performs under the toughest conditions

Optimal performance begins with quality components.

Custom elastomeric seal protects sensor from environmental underhood elements such as dust, vapor, and liquids

Undergoes extensive testing to ensure quality and reliability out of the box

All NAPA® Echlin®-manufactured ETBs are built in our North American IATF 16949-certified facility

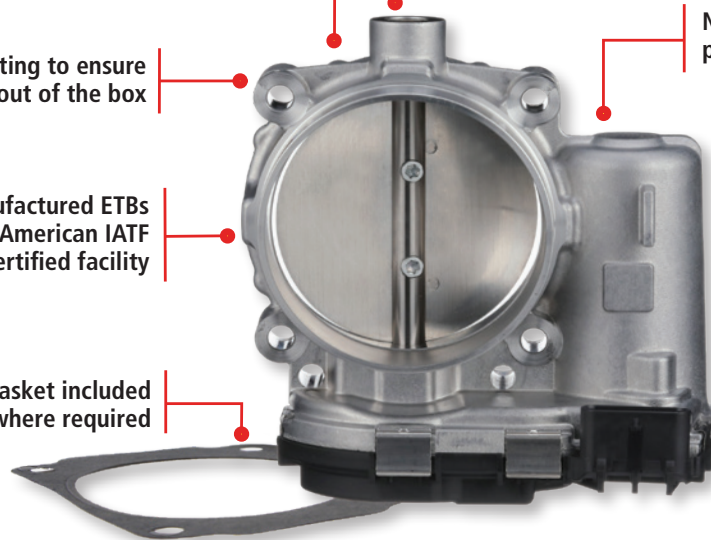

Gasket included where required

As a basic manufacturer, NAPA® Echlin® engineers upgrades to failure-prone OE components

NEW, never remanufactured, which maximizes performance and extends service life

100% calibration and testing ensure superior performance and durability

Magnet molded in high-performance polymer to ensure consistent location and low friction with bearing surfaces
