7.3L Ford Powerstroke Injector Identification

NED Product

- INJ209R, INJ212R, INJ217R, INJ218R
- Metal plate on top of the solenoid laser etched with the SMP logo or Pure Power logo
- Older production have SMP logo etched on the collet

NON-NED Product

- No metal plate with logo on top of the solenoid
- Hand etched number on the collet

6.0L Ford Powerstroke Injector Identification

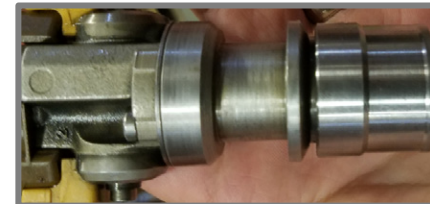

NED Product

- INJ220R, INJ225R
- Have the Pure Power Technologies logo etched on the body of the injector
- Earlier SMP product carried SMP logo and date codes that are etched into the body of the injector as seen in the image on the right

NON-NED Product

- No Pure Power logo or SMP markings

6.4L Ford Powerstroke Injector Identification

NED Product

- INJ230R
- Have the Pure Power Technologies logo etched on the body of the injector

NON-NED Product

- No Pure Power logo or SMP markings

6.6L Duramax Injector Identification (INJ135R)

NED Product

- INJ135R
- Multiple styles of GM 6.6L Duramax injectors
- SMP logo is laser etched on the body of the injector

NON-NED Product

- No SMP markings

6.6L Duramax Injector Identification (INJ136R)

NED Product

- INJ136R
- Multiple styles of GM 6.6L Duramax injectors
- SMP logo is laser etched on the body of the injector

NON-NED Product

- No SMP markings

6.6L Duramax Injector Identification (INJ140R, INJ145R)

NED Product

- INJ140R, INJ145R
- Multiple styles of GM 6.6L Duramax injectors
- SMP logo is laser etched on the body of the injector

NON-NED Product

- No SMP markings

5.9L Dodge Cummins Injector Identification (FJ932, FJ933)

NED Product

- INJ326R, INJ335R
- The SMP logo is laser etched on the body of the injector

NON-NED Product

- No SMP markings

6.7L Dodge Cummins Injector Identification

NED Product

- INJ332R, INJ338R, INJ340R, INJ345R, INJ346R
- SMP logo is laser etched on the body

NON-NED Product

- No SMP marking
- May have hand etched numbers on the body.

7.3L Ford Powerstroke HPOP Identification

NED Product

- HPP200R, HPP203R, HPP205R, HPP210R
- SMP logo is etched on the end cap

NON-NED Product

- No SMP markings

6.0L Ford Powerstroke HPOP Identification

NED Product

- HPP214R
- SMP logo is etched on the end cap

NON-NED Product

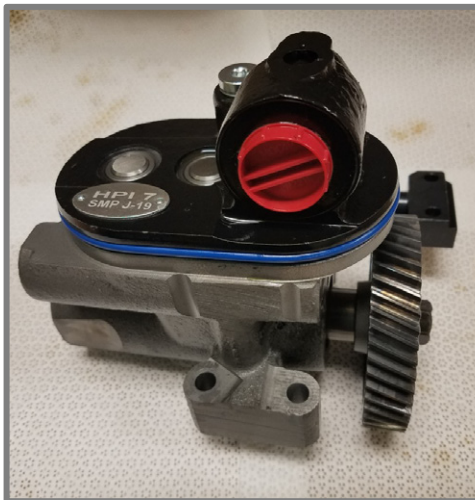

- No SMP markings

6.0L Ford Powerstroke HPOP Identification

NED Product

- HPP218R
- SMP logo is etched on a small placard attached to the top of the unit
- Early units use a rectangular placard
Later units are oval in shape

NON-NED Product

- No SMP markings

6.6L GM & 6.7L Dodge Injection Pump Identification

NED Product

- IP140R, IP141R, IP142R, IP315R, IP318R, IP320R
- SMP logo and part number are stamped into the body of the pump.

NON-NED Product

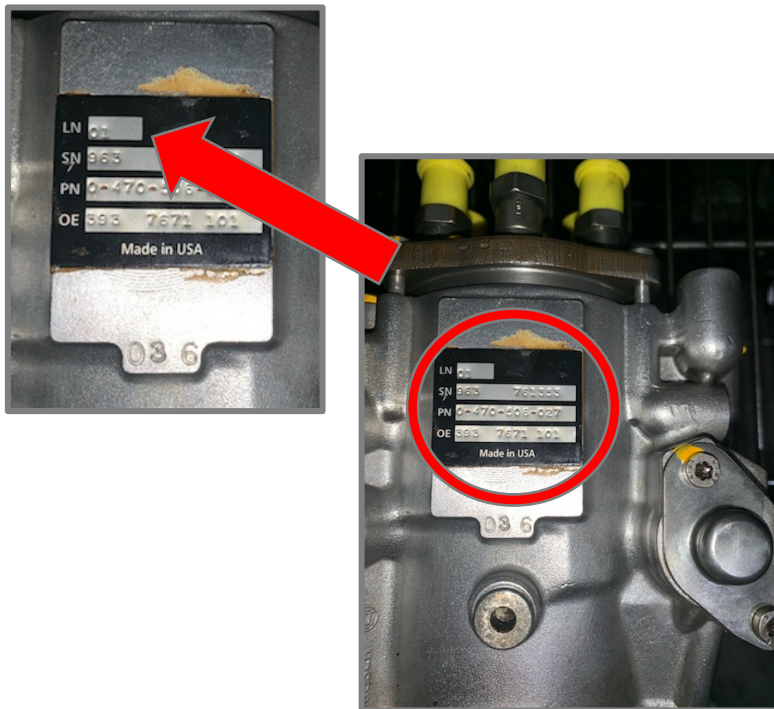

- No SMP markings

5.9L Dodge Cummins VP44 Injection Pump Identification

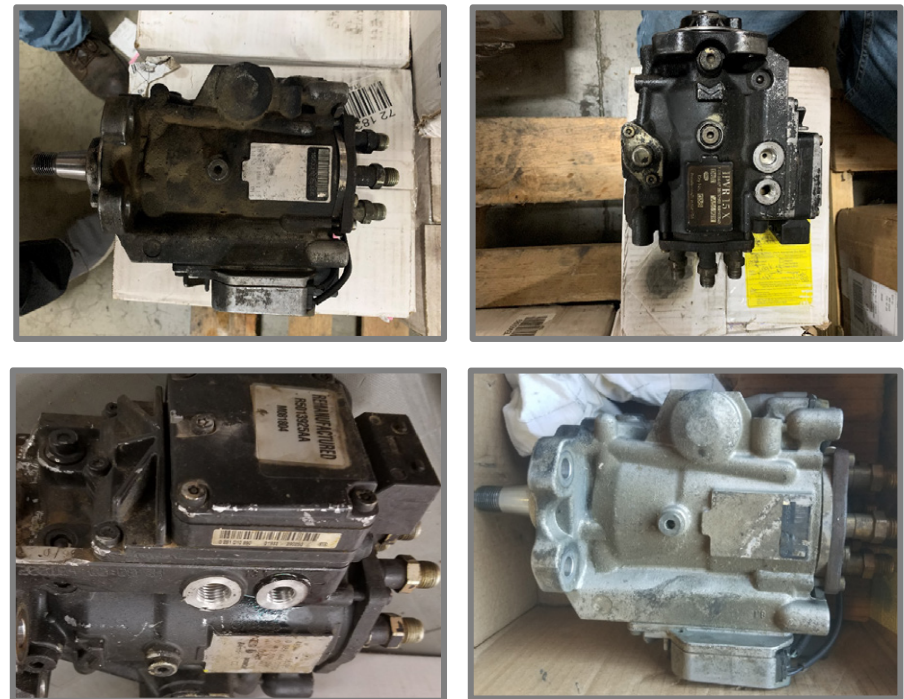

NED Product

- IP309R, IP310R
- “01” designation in the top space of the placard

NON-NED Product

- No SMP markings
- No “01” designation

6.2L/6.5L GM – 6.9L/7.3L Injection Pump Identification

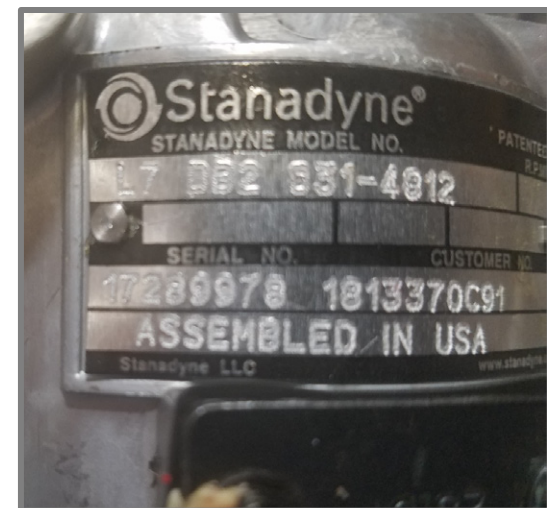

NED Product

- IP100R, IP134R, IP135R, IP300R, IP302R
- SMP name and part number stamped on Stanadyne logo

NON-NED Product

- No SMP markings

SMP Identification for Balance of the SMP Diesel Line

- Prior to the current identification process that is in use today, SMP used the SMP logo accompanied by a letter designation and a Julian date code.
- A sample would look like this: **“SMP-A 495 16321”**
- The letter after the SMP logo may vary, sample letter codes are: **A, B, C, D, E, F, G**. Any of these letter codes with “SMP” before them confirms that this is SMP product.
- These are primarily be found on injectors, high pressure oil pumps and high-pressure injection pumps. Products with these types of date codes and identification are older production and have worked their way through the system but they occasionally show up and should be properly identified and handled accordingly.
- **Be sure to properly identify parts before submitting for warranty.**
- If there is a question about product source, contact your local SMP representative.
