

ECHLIN®

CRANKCASE VENTILATION PROGRAM

WHAT'S IN YOUR BOX?

NAPA® Echlin's Crankcase Ventilation products help restore engine performance

Carbon build-up has become a major problem with modern engines. NAPA® Echlin's full line of precision-engineered Crankcase Ventilation components are specifically designed to send the crankcase gases back to the combustion chamber to be burned. This reduces air pollution, oil sludge and carbon build up.

What's inside the NAPA® Echlin® box... advanced engineering, precision manufacturing, extensive testing, and on-vehicle validation. What's in your box?

NAPA® Echlin's comprehensive Crankcase Ventilation Program includes PCV Valves, Crankcase Breather Hoses, Ventilation Filters, and the complex Engine Oil Separators found on late model vehicles. When an OE part fails, you can always trust NAPA® Echlin® to restore performance and keep vehicles running clean.

530+
SKUs

NAPA® Echlin® offers more than 530 Crankcase Ventilation components, including related parts, for a complete system service

100%
TESTED & VALIDATED

NAPA® Echlin® Crankcase Ventilation Components are subjected to rigorous lab testing and are validated on actual vehicles

NAPA® Echlin® Crankcase components work as the OE intended to reduce harmful pollutants

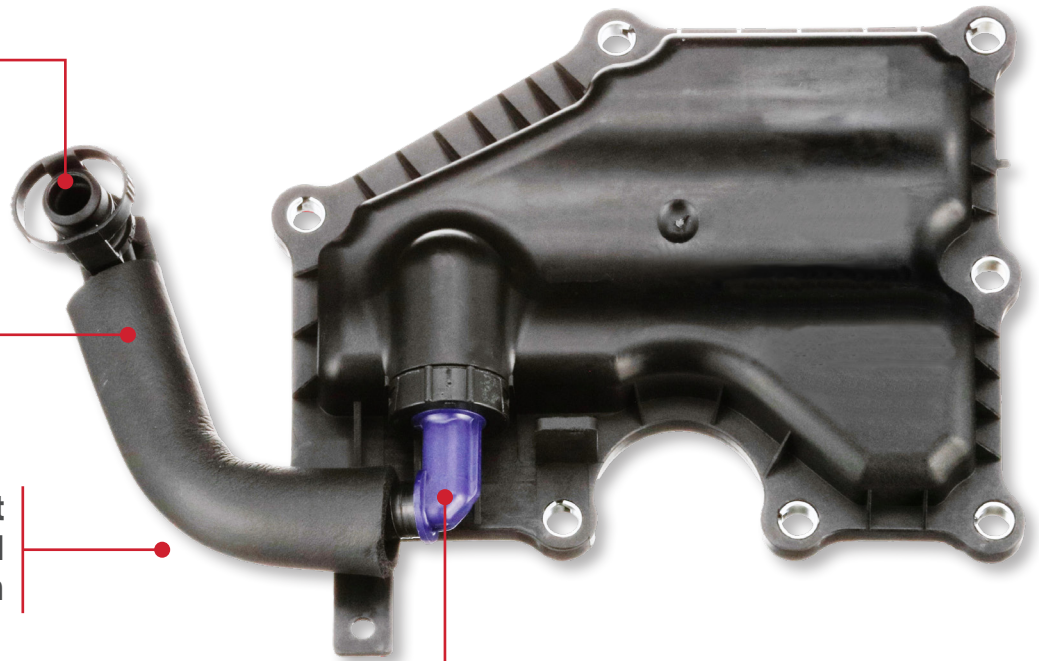

NAPA® Echlin® Engine Oil Separators are precision engineered to help reduce carbon build-up

OE-Matching Fittings
Quick-disconnect fittings ensure exact fit and fast installation

Foam Hose Insulator
Protects hose from high underhood temperatures

Direct-fit OE Replacement
For a quick and efficient installation

Complete Assembly
Assembly includes installed PCV Valve and hose to save technicians time

SEP719
Ford Cars & SUVs
(2022-09)
VIO: 4.2M

NAPA® Echlin's Crankcase Ventilation Program Includes:

- Crankcase Breather Hoses
- Crankcase Ventilation Filters
- Engine Oil Separators
- Oil Filler Tubes
- PCV Grommets
- PCV Valves
- PCV Valve Elbows
- PCV Valve Hose Tees

ECHLIN®

LOOKS RIGHT. FITS RIGHT. PERFORMS RIGHT.
