

# The Clean™ Plan Improves Fuel Economy and Reduces Emissions

The Clean™ Plan is a comprehensive fuel injection cleaning program that combines do-it-yourself preventative maintenance with an annual professional cleaning; a partnership between you and your trusted service technician.

**clean™**  
use every  
5,000 miles  
and see  
a pro yearly

**plan**

Follow the Clean™ Plan  
to save money at the  
pump and have a  
smoother running vehicle.

## Why do Fuel Injectors Get Dirty?

Over time, deposits build up on the injector nozzles altering the spray volume and pattern. These deposits come from additives used in gasoline. As injectors get clogged, your car may hesitate, stumble, suddenly lose power, idle rough or be difficult to start. By removing the deposits, your fuel injectors work efficiently, giving your vehicle proper fuel delivery and maximum power.

## Fuel Injectors Need a Professional Cleaning Once a Year and Regular Cleaning in Between

By having your fuel injectors professionally cleaned once a year, you are making a lasting investment in your vehicle. And by regularly using Clean™ Fuel Injection Cleaner, every 5,000 miles between professional cleanings, you can help maximize the professional cleaning process and minimize the build-up between cleanings. We call this the Clean™ Plan – to improve your fuel economy, starting, acceleration, overall performance and reduce emissions too!

## What is Clean™ Fuel Injection Cleaner?

Clean™ Fuel Injection Cleaner with Omniclean™ is made from the same professional-strength formula your trusted technician uses. Simply pour a bottle of Clean™ into a full tank of gas to help keep your injectors clean in between professional cleanings.

**Keeping your fuel injectors clean is a partnership between you and your trusted service technician.**
