Echlin® Expands Parking Brake Actuator Program

Key Takeaways

- Parking brake actuators are safety-critical components, and are one of the fastest-growing categories in the industry
- Echlin® Parking Brake Actuators are 100% new, never remanufactured, and are designed to match OE performance and seamlessly integrate with electronic safety systems
- Echlin's Parking Brake Actuator program is the most comprehensive in the industry, offering coverage for millions of import and domestic vehicles

NEW YORK, N.Y., April 15, 2025 – Echlin® continues to add to its growing Electronic Parking Brake Actuator program. Parking brake actuators are one of the fastest-growing categories in the automotive aftermarket, and Echlin® offers industry-leading coverage for import and domestic vehicles.

On almost all new vehicles, manually operated cable parking brakes have been replaced by electronic parking brake actuators. These new actuators are also an integral part of electronic safety systems found on today's vehicles. Echlin® Parking Brake Actuators are always 100% new, never remanufactured, and are designed to match OE performance and integrate seamlessly with electronic safety systems. Plug and play design means that no additional programming is required during installation, and many Parking Brake Actuators include the necessary O-ring and hardware for a complete repair. Precision engineering ensures long-term durability and performance. Additionally, Echlin® subjects each Parking Brake Actuator to rigorous testing in its lab in New York and on actual vehicles at its Testing Center in Texas for durability and optimum performance in all conditions.

Echlin® has recently introduced new coverage in this category for millions of late-model import and domestic vehicles. New applications include Ford vehicles like the 2023-22 Escape, Bronco Sport and Maverick, as well as 2024-23 Super Duty trucks. Coverage was also added for the 2024-22 Jeep Grand Cherokee and 2024-22 Ram ProMaster, as well as Mercedes-Benz vehicles through 2023 and Subaru vehicles through 2024. Additional new coverage includes popular Mazda, Audi, Volkswagen, and General Motors vehicles.

All Echlin® Parking Brake Actuators are listed in the catalog found at [NAPAEchlin.com](https://www.NAPAEchlin.com) and in electronic catalog providers.

About Echlin®

Echlin® engineers and manufactures top-quality ignition & electrical, emissions, fuel, wire, power management, sensors, safety-related systems components and more for import and domestic vehicles. This full line of premium automotive products includes diesel components, turbochargers, TPMS, VVT, ADAS and thousands of sensors and switches. NAPA® Echlin's line of high-quality parts are unrivaled for

their superior quality, original match and comprehensive coverage. For more information, visit NAPAEchlin.com. **NAPA® Echlin® Looks Right. Fits Right. Performs Right.**
