

ECHLIN

DID YOU KNOW?

Gasoline Direct Injection (GDI)

With GDI becoming more popular in late-model applications, NAPA® Echlin® are leading the way with coverage and quality. NAPA® Echlin® advanced flow-matched Gasoline Direct Injection (GDI) injectors promote smooth engine operation and balanced fuel delivery, reducing overall fuel consumption and harmful emissions.

Stainless steel calibration slide and spring assembly prevents corrosion within fuel control body leading to extended service life

High-temp Viton® O-rings enable prolonged sealing of injector under extreme heat conditions

Precision wound and trimmed solenoid windings allow computer to command efficient fuel delivery
