

# TECH EXPERT™ SOLUTIONS

## Thermostat Housing Assembly

BMW Cars & SUVs 2006-99  
VIO over 1.1 Million

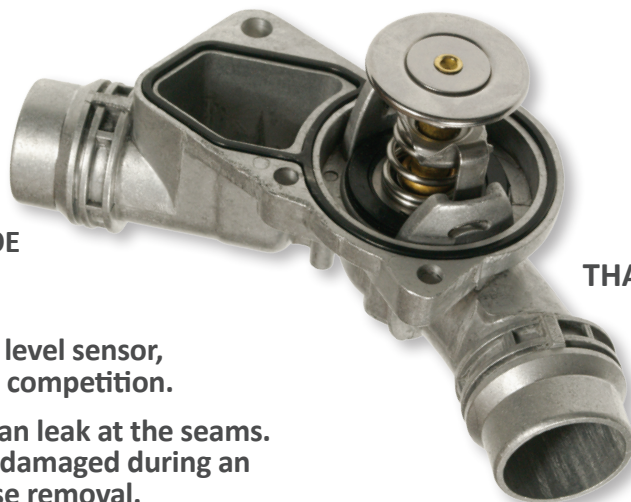

TECH EXPERT™ aluminum construction replaces the weak OE plastic design to prevent leaks.

TECH EXPERT™ includes a coolant level sensor, thermostat and gasket unlike the competition.

Over time the OE plastic design can leak at the seams. The plastic housing can easily be damaged during an unrelated repair or a radiator hose removal.

THA700

## Expansion Tank Service Kit

EXP700

BMW 2006-00  
VIO over 500,000

Everything needed to do the job right in one box—includes tank, oil cooler thermostat, and coolant level sensor!
