

Did You Know?

NAPA® Echlin®

Fuel / Water Separator Sensor (2-95001)

Fuel/Water Separator Sensors monitor the vehicle's diesel fuel for the presence of water triggering the vehicle's warning light to illuminate when it senses water is present. NAPA® Echlin® offers a full line of Fuel/Water Separator Sensors including the sensor for the GM DuraMax Diesels. The DuraMax fuel/water separator sensor can easily be damaged during a routine fuel filter replacement, making this a high-failure, high-replacement part.

2-95001

Fits GM DuraMax Diesels (10-01) High-Failure Rate Part

- Chevrolet Fullsize Pickup (10-01)
- Chevrolet G Series Fullsize Van / Express (06)
