

Get the Job Done Right the First Time

Tech Expert™ by NAPA® Echlin® is an exciting new brand of enhanced products specifically developed to meet the needs of today's automotive repair experts. Tech Expert™ was designed to help professional technicians with the latest automotive technology, new categories, and problem-solving improvements to the original part with a proven quality you can trust.

Tech Expert™ brings NAPA Echlin's innovation, engineering expertise, superior product quality, meticulous testing, unmatched customer service, competitive pricing, and brand integrity to an entirely new product line.

Expert Solutions for Professional Technicians™

See our Tech Expert™ Technician Bench Guide at www.TechExpertBenchGuide.com for other exciting Tech Expert™ problem-solving products that help you get the job done right.

EXPERT SOLUTIONS

Fuel Pressure Regulator Upgrade Kit

The new Tech Expert™ FPU100 Fuel Pressure Regulator Upgrade Kit updates the fuel pressure regulator spring of Ford's 6.0L Power Stroke diesel engines. Over time the stock spring can weaken and fuel pressure drops resulting in hard starting, stalling, poor fuel mileage and poor acceleration. The upgrade kit includes a new blue spring, housing, o-rings and hardware to rebuild the fuel filter housing. With the Tech Expert™ FPU100 kit installed, most will see an increase of 10-15 PSI of fuel pressure. The added fuel pressure restores drivability and will help keep the fuel pressure from dropping too low and the injectors from out-flowing the stock fuel pump – meaning no air in the injectors and much longer injector life.
