

**PERFECT FIT
EVERY TIME**

Save time and have peace of mind knowing that the easy-to-install NAPA® Belden® Edge line meets and quite often exceeds OE requirements. We design, engineer, manufacture and test every set to ensure you are getting the most advanced, reliable product possible.

**UPGRADES &
ENHANCEMENTS**

NAPA® Belden® Edge wire sets include factory installed wire clips, trays and protective loom* designed to keep spark plug wires sorted individually and properly spaced. This prevents melted casings, electrical arcs, and allows for a quick, clean installation.

**PROTECTION &
ENERGY FLOW**

When subjected to engine heat, inferior wires melt and corrode. NAPA® Belden® Edge stops melting and corrosion before it starts. To do this, we changed the way our wires are made.

It takes high voltage to power a vehicle. Our wires are engineered to offer low resistance and high inductance. This means higher voltage and more power that's transferred faster and with more strength, resulting in improved power, efficiency and performance.

NAPA® Belden® Edge Premium Spark Plug Wires come ready for installation straight out of the box. Each set carries our history of engineering leadership and innovation. Our NAPA® Belden® Edge line is built to save you and your customers time and money with our EZ-Fit design and “Wired for Life” guarantee.

*Upgrades specific to make and model of vehicles

Get “Wired for Life” with NAPA® Belden® Edge | Your First Step to The Ultimate Tune-up

For over 80 years, NAPA® Echlin® has excelled as a producer of engine management, wire and cable, and temperature control replacement parts. Echlin is pleased to partner with Belden to offer NAPA® Belden® Edge Premium Spark Plug Wires - a product featuring patented technological advancements and easy, out-of-the-box installation. With a long history of design innovation, Echlin's product expertise and manufacturing capabilities are vital assets in making Belden the most trusted name in spark plug wires.

FORMULA
46

THE WIRE

Formula 46 is a specially developed wire casing offering superior heat protection. This patented protective coating uses a durable silicone base and chemical compound that is permanently bonded through grafting to create an impenetrable shield scientifically designed for strength to battle extreme heat and cold.

On the inside our unique inner core offers ultra-low resistance and higher voltage. This maximizes the flow of energy from ignition to the spark plug for smoother starts, better performance and more power.

OUR BOOTS

Superior material and boot construction means NAPA® Belden® Edge will match or quite often exceed the original specifications for fit, form and function. Our engineers took it one step further with an improved seal that keeps moisture out and energy in, and flowing.

CLIPS/TRAYS/LOOM

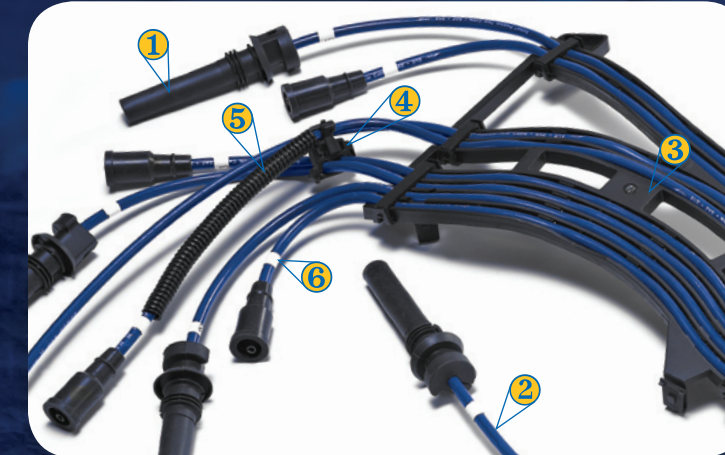

Our innovative Edge design includes factory installed wire clips, trays and protective loom to keep spark plug wires properly sorted, spaced and positioned, preventing melted casings and wire arcing. These enhancements are at the heart of our time-saving EZ-Fit design for a quick and perfect installation every time. NAPA® Belden® Edge delivers more to your customers and to your bottom line.

NAPA Belden® EDGE
PREMIUM SPARK PLUG WIRES

- ① OE Matching Boots
- ② Patented Wire
- ③ Routing Tray
- ④ Wire Clips
- ⑤ Protective Loom
- ⑥ Cylinder# Identification

COMPETITION — ① OE Matching Boots

DODGE TRUCK HEMI 5.7L 2005-03

VOLKSWAGEN CABRIO, GOLF, JETTA, PASSAT 2.0L 2002-93

TOYOTA 4 RUNNER, T100, TACOMA 2.7L 97-94

SOMETIMES, SEEING IS BELIEVING.

NAPA® Belden® Edge Premium Spark Plug Wires provide a real Edge with features not seen in competitive sets while offering complete coverage for import and domestic vehicles.
