UNIVERSAL
Programmable TPMS Sensors

OE-Matching Program

Direct-fit OE-matching sensors match the original for fit, form, and function

- NSF® registered and independently tested to match OE protocols and provide a superior level of assurance for proper fit, form, and function
- Preprogrammed at factory with the exact OE protocol so they're ready to install right out of the box
- OE-Relearned or ID-Cloned – technician's choice
- Designed to operate within extremely tight radio frequency (RF), eliminating most external interference for more accurate monitoring of tires

Universal Program

2 sensors, available in 315 and 433 MHz, provide coverage for both Domestic and Import Applications

- NSF® registered and independently tested to match OE protocols including Auto-Locate Technology such as PAL, LS, and WAL
- Sensors must be software programmed for the specific vehicle application prior to installation with a compatible TPMS service tool
- Once Programmed, can be OE-Relearned or ID-Cloned – technician's choice
- Available with interchangeable rubber (snap-in) or metal (clamp-in) valves
- Supports High Pressure Applications

To solve your TPMS problems, NAPA® Echlin® offers a complete, BLENDED Program, consisting of our OE-Matching, and QWIK Universal Programs which covers 99.9% of the vehicles you will service in your shop today. Both sensor programs combine to provide a one stop shopping solution for all of your TPMS parts and service needs, including service kits, shop tools, and best in class field support.

This makes NAPA® Echlin® the perfect TPMS solution for you and your customers.

When your OE TPMS sensors fail, there's only one replacement brand you need to know: NAPA® Echlin.
