TURBOCHARGER BOOST SOLENOIDS

Think NAPA® Echlin® First: Direct Replacement

The turbocharger boost solenoid monitors the amount of boost generated in a turbocharged motor.

The Problem: Faulty turbocharger solenoids won't properly monitor the amount of boost generated in a turbocharged motor, which will decrease the life of the turbo and motor.

Our Response: NAPA® Echlin's Turbocharger Solenoid is a direct replacement that regulates the amount of boost being generated from the turbocharger.
