Oil pressure switches are manufactured in IATF 16949-certified facilities in North America

NAPA® Echlin® includes the engine oil pressure filter with select GM oil pressure switches where needed

NAPA® Echlin® Oil Pressure Switches include features that make your job a little easier.

What's behind our Oil Pressure Switch is as important as what's inside.

NAPA® Echlin® oil pressure switches are manufactured in our IATF 16949 quality-certified facility in Independence, Kansas. This plant is also ISO 14001 (environmental) certified and recycles fluids, metals and all other reusable materials.

Our facility is vertically-integrated, so all switches and sensors are designed, engineered, manufactured, and tested at the same location. This means you can always count on NAPA® Echlin® oil pressure switches to deliver precise, repeatable performance.
