

Did You Know?

Control At Your Fingertips

Modern vehicles often combine control of several systems together in a single "combination" or "universal" switch mounted on the steering column. Examples of these combined systems include Cruise Control & Headlights, Headlights & Wipers, or even Cruise Control, Headlights, & Wipers.

There's no need to return to the dealer for these complicated switches, contact the professionals at NAPA Auto Parts for all your automotive needs. They have what you need, Domestic & Import, with the quality, confidence and performance you expect in the box.
