

Did You Know?

ICA101 Coil Adapter Pack

The Pack is tough! Made of high performance plastic, the ICA101 Coil Adapter pack is built to withstand flex breakage and accidental drops. The ICA101 conforms to rigid OE specs in color, fit and performance. It comes equipped with a handy hardware kit for complete installation.

White High Performance Grade Electrical Plastic:

- OEM look alike; color matched to OEM corrected version. Original version, black.
- Resists flex breakage and accidental drops during installation.
- Impact resistant
- Resists electrical puncture. Resists heat deterioration.
- Resists ozone deterioration – All for optimum performance, trouble free long life and driving security.

Hardware Kit:

- For complete installation and ease of purchase.

Flexible Dielectric Plastic Secondary Insulators:

- Resists ozone attacks and cracking; easy installation and removal access.

Spring Steel Electric Conductors:

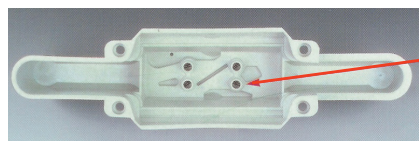

- High grade spring steel resists breakage and burn through for extended long life and no radio frequency interference.

Two Stage Molding Process:

- Enhanced stability of conductor wire placement during manufacturing.

Accurate Placement of Conductor Wire During Manufacturing:

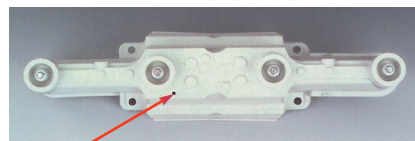

- Resists electrical puncture and burn through during vehicle operation.

BOTTOM VIEW

Vent Hole:

- Accelerates moisture dissipation reducing potential coil arcing.
- Vents ozone build up during operation reducing connection oxidation for extended life.

TOP VIEW

Aluminum Alloy Inserts:

- Matched to OEM for high strength and excellent conductivity for improved durability, added performance and long life.
