Tech Expert™ Electronic Throttle Bodies

The Problem: When an electronic throttle body fails, it can affect a vehicle's power, fuel economy, and drivability.

Our Response: Meeting the demand for high-quality replacements, Tech Expert's line of Electronic Throttle Bodies includes more than 130 direct-replacement units and covers more than 65 million vehicles on the road today. To ensure quality and reliability, each unit is 100% new. Our units eliminate the comebacks that can be caused by reusing old worn out components in a remanufactured unit.

100% NEW

Undergoes extensive testing to ensure quality and reliability out of the box

OE-Exact-Match fit, form, and function maximizes performance and extends service life

TECH EXPERT® Tip: A factory relearn is required after installation of certain models, so be sure to follow the OE service manual when installing a new throttle body.

Superior Testing, Extensive Coverage

Tech Expert's Electronic Throttle Bodies undergo extensive in-house testing at NAPA Echlin's engineering department in Long Island City, NY, where our engineers look at flow, output, and life cycle tests to ensure each unit meets our customers' high performance standards. The result is a premium-quality replacement with coverage for an array of Domestic, Asian, and European vehicles.
